Medicare Part B –Therapy Cap Explanation

As you may know, Medicare limits or "caps" the amount it will pay for outpatient physical therapy, services in a calendar year. The annual per beneficiary therapy cap amount for 2017 is \$1,960 for outpatient physical therapy. This applies to the outpatient therapy services in a private practice, a physician's office, a skilled nursing facility, a hospital based outpatient, or a rehabilitation facility.

Our office has access to real time Medicare information and can inform you of the total amount of "cap" used till date. However, please be aware that this applies only to amount reimbursed and not claims that may be pending with Medicare. Your therapist is aware of this financial limitation and can apply for an exception if your care requires medically necessary services—as defined by Medicare—above the cap.

Medicare beneficiaries can find more information on the cap on the Medicare Website, <http://go.cms.gov/MedRev> or call-1-800-MEDICARE (-1-800-633-4227). TTY users should call 877-486-2048.

I have read and understand the Medicare therapy cap information.
